- Finished 1 National Event which Unair Open 2023 within 100+ participants with good result in Goods Division

CERTIFICATION

Intermediate Junior Web Developer Vocational School Graduate Academy

Digital Talent Scholarship · 2025

Cisco Networking Academy Certificate : Linux Unhatched

Cisco Networking Academy · 2024

SKILLS

Language **:** Python, Dart, Java, PHP, JavaScript, Go

DevOps **:** Docker, GitHub, Git

Databases **:** MySQL, Postgres, PocketBase, MongoDB

Framework **:** Laravel, Flutter, NextJS, GoFiber

Additional **:** Ms.Office, Figma

PROJECT

Confidental - **User & Achievement Management** (2025)

This is a backend service built using Go (fiber) based on existing Software Requirement Specification (SRS). Integrated PostgreSQL and MongoDB for structured and dynamic achievement data

Muhammadiyah App (Proffesional) - User & Ticket Management (2025)

The app is built with the Flutter architecture integrated with a Golang REST API for the backend and PostgreSQL database management.

CookMate - Mobile App Recipe Management (2025)

The app is built with the Flutter architecture integrated with a PocketBase REST API for the backend and NoSQL database management.

ClothIn - Company Landing Page (2025)

The website is built using HTML and Tailwind CSS as its foundation, with JavaScript implementation for interactive user interfaces.

HahTicket - Dynamic Web Ticketing (2024)

This is a dynamic website for buying and selling tickets, integrated with the Midtrans payment gateway sandbox API. The platform provides user, role, and ticket management, as well as payment processing.

Confidental - Store Management (2024)

This is a store management app web based focused on handling return processing, user management, goods management, backend logic, and database queries.
